

ACTION ALERT

**Congress is targeting
mental health coverage.**

Take action now.

#KeepWhatWorks

Right now, the U.S. Senate is working on its own version of the American Health Care Act.

The AHCA, which the U.S. House of Representatives passed earlier this month, decimates mental health coverage.

**NOW is the time
to contact our U.S. Senators telling them:**

- NO cuts to Medicaid, a critical source of mental health services.
- NO to ending Medicaid expansion - a lifeline for single adults with mental illness who fall through the cracks.
- NO to allowing plans to drop coverage of mental health and substance use.
- NO to charging people higher premiums if they have a pre-existing condition, like depression or anxiety.
- NO to yearly and lifetime limits on mental health coverage.

#KeepWhatWorks

**Call or email Senator Pat Toomey AND
Senator Bob Casey.**

**Tell them to stand up for mental health care and
reject cuts to Medicaid and mental health protections.**

NAMI is nonpartisan. We support policies that help people with mental health conditions and their families.
